

2. Niagara Conservation

The Stealth UHET Dual Flush takes "low flow" to new levels. This ultra-high-efficiency toilet offers two flush options: .95 gallon for a full flush and .5 gallon for a half. niagaraconservation.com

3. TOTO USA

Germs have no place to hide when it comes to the Neorest 750H, an integrated toilet featuring dual-flush technology that thoroughly cleans the pre-misted bowl. It uses 1 gallon for a full flush and .8 for a light flush. After flushing, a UV light activates the bowl's titanium dioxide coating, creating a reaction that destroys any remaining material in the toilet. totousa.com

4. Kohler

Inspired by the angular styles of the 1930s, the single-flush Kathryn relies on modern technology, meeting WaterSense rules with 1.28 gallons per flush. It offers chair-level comfort-height seating and comes in 11 colors. kohler.com

5. American Standard

The recent expansion of the Cadet PRO toilets gives homeowners an easy way to customize their bathroom while staying within one product line. With five tank styles and five bowl options of varying heights and shapes, it offers a mix of styles. Standard and high-efficiency models are available. americanstandard-us.com

6. Gerber Plumbing Fixtures

The Viper elongated toilet uses 1.28 gallons of water in a single flush. It features a two-piece design, 3-in. flush valve and a 2-in. glazed trapway. gerber.com
