

The Cost of **SAVING WATER**

For cities, there are numerous options for saving water and each of them comes at a cost. Making a sound choice with the largest savings potential is key. **The most efficient and cost effective way to save water is to invest in Niagara's UHET™ Water-Saving Kits ...without question.**

Average Cost per **1,000 Gallons**

 Rain Harvesting	\$179.00
 Turf Replacement	\$5.00
 UHET™ WATER SAVING KITS	\$0.20

UHET™ WATER-SAVING KITS

featuring **STEALTH™**
TECHNOLOGY

Save up to **40,000 GALLONS³** per year per household.

Earth™ Showerhead

1.25 GPM
Kitchen Aerator

0.5 GPM
Bathroom Aerators

- One (1) 0.8 GPF Stealth Single Flush Toilet
- One (1) 1.0/1.25 GPM Chrome Earth™ Showerhead
- One (1) 1.25 GPM (Average) Kitchen Aerator
- Two (2) 0.5 GPM Bubble Spray Aerators

INSTALL UHET KITS WITH
STEALTH TECHNOLOGY

SAVE WATER, MONEY,
AND ENERGY

SAVE THE
PLANET

Save **ONE BILLION** gallons of water a year *at no cost.*

If one household of three installed a UHET™ Water-Savings Kit with Stealth® Technology, they would save up to **40,000 GALLONS** of water³ and **\$150** or more on hot water/energy bills⁴ per year.

If 25,000 households are retrofitted, the potential savings are estimated at **one billion gallons of water** per year. Renters and owners would see a collective savings of **\$3.75 million in energy bills.**

World Leaders in **WATER CONSERVATION**

Israel is well-known for its high-tech water technology such as desalination and drip irrigation. Australia has mastered rainwater harvesting and Saudi Arabia has implemented solar energy in their desalination plants.⁵

However, while these programs have had proven results, the cost is high. Seeing the cost benefits of the Stealth, the Saudi Arabia government decided to take water conservation to the next level by introducing Stealth toilets in their utility conservation program. By switching to Stealth technology, your city would save a significant amount of water and energy!
