High-Efficiency Toilet Design Fights Drought and Saves Money

TOPICS: High Efficiency Toilet Niagara Conservation

Stealth Phantom Toilet

POSTED BY: RETROFIT MAGAZINE EDITOR FEBRUARY 6, 2018

The Stealth Phantom is a high-efficiency toilet designed to fight drought, help protect the environment and save money.

Niagara Conservation has unveiled its Stealth Phantom, a high-efficiency toilet. The Phantom features the Niagara patented Stealth technology in an eco-minded lean silhouette.

Features:

- Two-piece unit
- Powerful flush – only uses 0.5 or 0.95 gallons per flush (gpf)
- Narrow tank with skirted bowl
- Elongated bowl for comfort
- Extended footprint design that covers existing footprint

The technology behind the toilet is designed to fight drought, help protect the environment and save money.
