

# Lovely Loos

**D**esign and functionality continue to make strong strides when it comes to an often-overlooked area of the home – the water closet. Today’s toilets and bidets showcase streamlined looks, smaller footprints and multifunctional, luxury options.

Cleanliness is key for both toilets and bidets, and innovations such as antibacterial glazed finishes, removable seats and superior flushing technology help control dirt and odors. Remote controls, touchless flushing and self-cleaning features also keep germs at bay.

On these two pages, *Kitchen & Bath Design News* showcases toilets and bidets featuring the latest styles, technological advancements and luxury options.

**1. DXV** has added the AT200 LS SpaLet integrated electronic bidet toilet to its SpaLet bidet toilet line. Conveniences include hands-free flushing, automated lid opening and closing, and seat heating, as well as adjustable two-nozzle water-spray system and integrated air dryer.

**3. TOTO** now offers the Aquia IV One- and Two- Piece Ultra High-Efficiency Dual-Flush Toilets with the new DynaMax Tornado Flush Technology, which cleans the entire bowl and rim with 360-degrees of cyclonic rinsing action. The bowl's CeFiONtect glazed surface prevents particulate matter from adhering to its surfaces, the firm notes.

**5. The Geberit Sigma80** flush actuator provides touchless operation. The toilet can be flushed by waving a hand over the light bars, small for half flush, large for full flush. The front surface is available in black or mirrored glass, and the low-energy LED light bars are featured in five user-selectable colors.

**6. The Renew and Renew Plus Bidet Cleansing Spa** toilet seats from **Bemis** provide a warm aerated wash with continuous heated water supply, and allow adjustment of the water temperature, pressure, spray and nozzle position for cleansing. A touch remote control retains personalized setting for two users.
