

Niagara Conservation Stealth one-piece Toilet

April 19, 2017

Niagara Conservation's Stealth One-Piece Toilet meets EPA WaterSense criteria and is MaP Premium-rated. The single-flush toilet uses 0.8 gallons per flush. The patented hydraulic and water-saving technology behind the toilet's technology involves a combination of air and water working in unison, resulting in a quiet flush without residual noise. The toilet is flapper-less and features a smooth, low friction ceramic surface that helps achieve a clear bowl.
