

Kitchen & Bath

Hardware collection in five finishes

Meshing modern and geometric forms with the ingot shape, **BELWITH-KEELER** launches its Ingot Collection as a unique design with a touch of ergonomics. Available in nine pull sizes ranging from 1 to 12 in., the collection comes in chrome, satin nickel, elusive golden nickel, brushed golden brass and matte black. Part of the company's recent launch of eight collections, the pulls include mounting hardware.

Modern pull-down kitchen faucet

MOEN launches its Sleek pull-down kitchen faucet to make a statement in the kitchen. Featuring a clean, cylindrical modern design, the faucet has a high-arc to provide height and reach for filling or cleaning large pots. Its two-function pull-down wand provides Power Clean spray technology, while the Reflex system allows users to toggle from steady stream to powerful rinse. The kitchen faucet can be installed with or without a deck plate, and is available in chrome, spot resist stainless and matte black finishes.

Ventilation line adds features

PANASONIC ECO SOLUTIONS NORTH AMERICA

adds a set of features to its WhisperValue DC ventilation line, enabling easy code compliance and longer service life. Along with the line's ECM motor, intelligent self-adjusting SmartFlow technology senses the amount of resistance in a duct run and adjusts fan speed to delivery optimal cfm output, even in the case of a complicated duct run. With a low-profile, 3 3/8-in. housing depth, the fan can be installed in virtually any ceiling or wall and features LED lighting.

Customized cabinetry with integrated lighting

The **WOOD-MODE** Integrated Lighting Program, featuring Häfele LED solutions, allows the integration of lighting concepts to occur during the cabinet design, selection and order process. Recess profiles are pre-installed and wire paths are prerouted during the cabinetry manufacturing process in some applications, then cabinetry and lighting solutions are installed on-site concurrently. A roster of complementary lighting solutions for the framed and frameless cabinets include interior cabinet lighting, drawer and shelf lighting, under-cabinet lighting and more.

Rustic, hand-forged bath collection

SONOMA FORGE aims to carve out a rustic-style niche within the modern leanings of the market with the introduction of its CiXX Collection. Hand-forged in solid brass or stainless steel, each piece is one-of-a-kind and shows the hammer marks of the blacksmith. Available in faucets, shower systems and coordinating accessories, the collection comes in wall- and deck-mount configurations, and faucets are available with Sans Hands Sensor Faucet Technology. The collection is also available in special order finishes.

Toilet's technology helps protect environment

NIAGARA CONSERVATION unveils its Stealth Phantom ultra high-efficiency toilet. Its Stealth flush chamber and air transfer system combine to deliver a quiet, powerful flush that thoroughly evacuates the bowl. The white two-piece toilet operates at a flush rate of 0.8 gpf, and its EZ Height design and elongated bowl make for easier use. An extended footprint design should cover an existing footprint; the toilet's rough-in is 12 in.
